

Display Logic Rules for the AFN/CLS Request Form in Primo

The Display Logic Rules configuration page determines when and for whom various Primo links appear for patrons, including the link to the CLS Request Form; this is referred to as the Resource Sharing Request.

The pathfinder to display logic rules: **[Configuration](#)**> **[Fulfillment](#)**> **[Discovery Interface](#)**> **[Display Logic](#)**> **[Display Logic Rules](#)**

In general, WRLC libraries are allowed to make in-house decisions and independently configure their own Display Logic Rules. However, below are some helpful configuration rules for the CLS Request Form

Hide the CLS Request Link from specific user groups

This rule will hide the CLS Request link (referred to as the Resource Sharing Request on this configuration page) from view for patrons whose accounts have a specific user group. This is a helpful if specific users are not allowed to place CLS requests (for example, alumni).

Edit Rule

For user from groups	<div>au alum x au ascb x au ascbg x au guest x au ilr x au rfbp x au wess x</div> <div> </div>
hide service *	<div>Resource Sharing Request x</div>
with	<div></div>
with value	<div></div>
if service exists	<div></div>

Cancel

Save and Close

- **For user from groups** : list of all user groups
- **hide service** : Resource Sharing Request

Hide the CLS Request Link when your Institution's copy is available for a Hold Request

This rule will hide the CLS Request link (referred to as the Resource Sharing Request on this configuration page) from view when the following conditions are met:

1. Your institution has a copy of this title
2. Your institution's copy has a status of Available
3. The patron is allowed to place a Hold on your institution's copy

This is helpful when you only want CLS requests to be placed for items your institution does not have already available to a patron.

Edit Rule

For user from groups	<input type="text"/>
hide service *	<div>Resource Sharing Request ✕</div>
with	<div>Availability by the institution</div>
with value *	<div>True</div>
if service exists	<div>Hold Request ✕</div>

Cancel Save and Close

- **hide service** : Resource Sharing Request
- **with** : Availability by the institution
- **with value** : True
- **if service exists** : Hold Request

For more information about Display Logic Rules, see the [Configuring Display Logic Rules page](#) on the Alma Knowledgebase
