

SUNY P2P partners Stony Brook, Binghamton, Albany, and Buffalo

Although the policy is for all Peer to Peer configuration to exist in the Institution Zone only, the following partner profiles are configured and managed in the WRLC Network Zone:

- Stony Brook University, SUNY
- Binghamton University, SUNY
- University at Albany, SUNY
- University at Buffalo, SUNY

If any WRLC institution wishes to make changes to the partner profiles above, please send in a Service Desk ticket at servicedesk@wrlc.org

Background

When the WRLC first started peer to peer lending in Alma, all of the configurations for this workflow were set in the Alma Network Zone; our four original partners were the schools listed above. The policy changed in 2025 to move P2P to be IZ-only, but the only part of configuration we were unable to move were the partner profiles.

This is because partner profiles need a unique code and a unique ISO symbol; our NZ profiles shared an ISO symbol with the partner profiles in the Community tab, so the Community profiles cannot be copied to the IZ. And if the NZ partner profiles were to have different ISO symbols, none of the requests attached to that particular partner profile would work. Moving the partner profiles to the IZ would result in service disruption for patrons.
