**Trouble shooting**:

If the handle server doesn't restart on reboot, check the lock file.

If lock file was not removed on shutdown/crash, it will need to be removed before the handle server can restart.

**Location**:  /opt/handle/svr1/txns/lock

```
-rw-r--r-- 1 root     www-data       4 Mar 25 09:50 lock
kilduff@crhandle:/opt/handle/svr1/txns$
```

Remove lock file.
