

Oxford University Press

Books

* Unpack books and check against list (boxes and packaging paper can be recycled)

* Scan barcodes using Notepad; email the file to Tammy

*Update item records using either Alma or Grima:

Alma (a large set of books)

* Create a set using the Notepad file

* Add “At WRLC waiting to be processed” to Internal Note 1 and “Property of Washington Research Library Consortium” to provenance code at the same time using the change physical job

Grima (a small set of books)

* Add “At WRLC waiting to be processed” to internal note 1 using the Grima tool:

<https://grima.wrlc.org/AddInternalNote/AddInternalNote.php>

* Add “Property of Washington Research Library Consortium” to provenance code using the Grima tool:

<https://grima.wrlc.org/AddProvenance/AddProvenance.php>

Be sure to select “Property of Washington Research Library Consortium” every time you scan a book. It still defaults to AU. It will be fixed eventually.

Revision #2
