

Shared Collections Facility (SCF) Institution Zone

UNDER CONSTRUCTION

Information on how the Shared Collections Facility Institution Zone (a.k.a. the SCF IZ) is configured, how to accession items to the SCF in Alma, and how SCF items in an owning Institution Zone (IZ) are copied to, requested from, etc. the SCF IZ.

Workflows for items at the SCF

Workflows on accessioning new items to the SCF, requesting SCF items, returning SCF items, etc.

Accessioning new items to SCF

Now that we have new architecture in which the owning IZ's item record is used for fulfillment, there are new procedures for preparing items to be sent to the SCF for accessions. Prior to taking any of the steps below, please contact the SCF Supervisor to arrange transport and ensure there is space in the processing areas. Creation of the SCF version of the record will be done automatically by a special script created by Ex Libris. To trigger the script, you will need to do the following:

1. Identify item(s) in the owning IZ that you would like to send to the SCF via weeding or other selection process.

Image not found or type unknown

2. Edit the items and give them a temporary location with the type "Remote Storage". You should be familiar with this list and it includes location codes like "wrlc stor" and "wrlc stnc". For the full list or if you aren't certain, you can check the physical locations list as shown below.

Image not found or type unknown

3. Editing the locations can be done to individual records during the weeding/selection process as shown below or as part of a batch change physical items job on a list of barcodes.

Image not found or type unknown

4. Scan in the item(s) barcode – this causes the item to be put in transit or in process so that the item does not appear as available while in transit to SCF and being processed by SCF staff.

Image not found or type unknown

5. Notify the Director of Library and User Services at WRLC and we will run the “**SCF publishing profile**” publishing profile job for your owning IZ. Note: do not edit the publishing profile in any way. This publishing profile uses a logical set of all items with a remote storage location. By running this job we will publish any new additions to this set and your items will automatically have an identical item record created in the SCF IZ.

Updating SCF items (barcodes, bibliographic records, etc.)

As detailed in the [Metadata Infrastructure in the SCF IZ](#) page, every item that resides in the WRLC's Shared Collections Facility (SCF) has two records in our Network Zone; one copy that resides in the owning Institution's IZ, and a second copy that resides in the SCF IZ.

Because of this, certain updates made to an SCF item in the owning Institution Zone are NOT automatically pushed out to the SCF catalog. Because of this discrepancy, the WRLC needs to be notified if certain changes are made to an SCF item.

Barcode

If the barcode of an SCF item is changed, please open a WRLC Service Desk ticket (servicedesk@wrlc.org) so that the SCF copy can be updated.

Without this necessary step, the SCF publishing app will create a separate item record in the SCF IZ containing the new barcode. This will result in two item records in the SCF IZ for the same item ; one with the old barcode, and one with the new barcode. WRLC must be notified of a barcode change in order to prevent this.

Bibliographic Record

If an SCF item is moved to a different bibliographic record, please open a WRLC Service Desk ticket (servicedesk@wrlc.org) so that the SCF copy can be updated.

Without this necessary step, requests for this item may fail. WRLC must be notified of a bib record change in order to prevent this. Please keep in mind, this policy applies to both items attached to an NZ record AND items attached to an IZ-only record.

SCF Publishing App

Behind the scenes look at how the SCF publishing app works for accessions, requests, returns, etc.

Metadata Infrastructure in the SCF IZ

Every item that resides in the WRLC's Shared Collections Facility (SCF) has two records in our Network Zone; a copy that resides in the owning Institution's IZ, and a second copy that resides in the SCF IZ. The second SCF copy is primarily used for shelf and workflow control at the SCF. Because of this, the SCF copy is suppressed from discovery in the patron-facing catalog (Primo). The record that patrons view in Primo is the record in the owning Institution's IZ.

When a patron requests an item located at the SCF, the request is attached to the owning institution's copy of the item record (the unsuppressed record). Then the SCF publishing app automatically transfers that request to the SCF copy of the item record (the suppressed record).

Bibliographic Records

If the owning Institution's item record is attached to a Network Zone bibliographic record, the SCF copy of the item record will also be attached to the same NZ bib record. The SCF holding and item records are suppressed from discovery in Primo.

The screenshot shows a Primo catalog record for the book "The theatre of Bertolt Brecht: a study from eight aspects." The record is displayed in a table with columns for Institution, Network, and Community. The record is selected, and the details are shown. The details include the title, author (Willett, John), subject (Brecht, Bertolt, -1898-1956), edition (3rd ed. revised), language (English), MMS ID (9911620768604101), creation date (07/11/2018 05:09 AM EDT), modification date (09/14/2023 02:55 PM EDT), and record number (OCoLC)02616710. The record is held by 2 institutions: My Institution and Shared storage institution.

Other details

The SCF copy of the bib record will have the MMS Id of the owning Institution's record in the 035 field; the inclusion of the MMS Id allows for requests of non-NZ linked items to occur.

Any updates made to the owning Institution's bib record will NOT be transferred to the SCF copy of the bib record.

If an SCF item is moved to a different bib record, please open a WRLC Service Desk ticket (servicedesk@wrlc.org) so that the SCF copy can be updated. Without this necessary step, requests for this item may fail. For more policies like this, see the [Updating SCF items \(barcodes, bibliographic records, etc.\)](#) page.

Holding Records

All SCF holding record copies are suppressed from Discovery.

Any updates made to the owning Institution's holding record will NOT be transferred to the SCF copy of the holding record.

Item Records

The SCF copy of the item record has a few key differences from the original owning Institution item record.

The barcode will have an 'X' appended to the end. In addition, a provenance code is added to keep track of which Institution owns the item.

Unlike the bib and holding records, updates made in the following fields to the owning Institution's copy of the item record will be transferred to the SCF copy:

- Material type
- Description
- Enumeration A
- Enumeration B
- Enumeration C
- Enumeration D
- Chronology I
- Chronology J
- Chronology K

If the barcode of an SCF item is changed, please open a WRLC Service Desk ticket (servicedesk@wrlc.org) so that the SCF copy can be updated. For more policies like this, see the [Updating SCF items \(barcodes, bibliographic records, etc.\)](#) page.

Item Locations

The permanent or temporary WRLC location in the owning Institution IZ is transferred to the SCF IZ as a permanent location.

If the item location in the owning IZ has one of the following location codes, the item in the SCF IZ will have the exact same location.

Any SCF location in the owning IZ that is NOT listed above will be given the default location of *wrlc stor* in the SCF IZ.

Primo VE

Although there are two record copies for each item, the patron only sees one item in Primo because all SCF records are suppressed.

For example, this bib record has both American University and SCF holdings attached.
